Price: \$34.32

Ex Tax: \$31.20

Short Description

Greywater Treatment is an additive for your greywater holding tank or greywater treatment system. Our beneficial microbes eat up soap, grease and fat residues from your shower, laundry and kitchen wastewater.

Description

Greywater Treatment is an additive for your greywater holding tank or greywater treatment system. Our beneficial microbes eat up soap, grease and fat residues from your shower, laundry and kitchen wastewater so your greywater holding tank or greywater treatment system runs odour free and with reduced maintenance requirements.

Greywater Treatment contains all natural, environmentally friendly ingredients.

Greywater treated with Greywater Treatment can be safely used to water lawns and gardens but should not be used on vegetable gardens or where contact with people or animals is likely, for example car/house washing or childrens activities.
